Navi Mumbai, Maharashtra, India

Data Analyst | AI/Machine Learning Engineer

AI & Data Science graduate with internship experiences in Data Analytics and Machine Learning. Proficient in Python, SQL, Microsoft Power BI, Pandas, NumPy, and Scikit-learn, with hands-on experience in data cleaning, exploratory data analysis (EDA), dashboard development, predictive modeling, AI applications, including the development of an agentic AI code-review tool using Python and FastAPI. Passionate about transforming complex data into actionable business insights.

SKILLS

Programming & Databases: Python | SQL | Java (Basic) | Javascript

Web Technologies: HTML | CSS | React.js (Basic)

Data Analysis & Visualization: Microsoft Power BI | Microsoft Excel | Pandas | NumPy | Matplotlib | Exploratory Data Analysis (EDA) | Data Cleaning

Machine Learning: Scikit-learn | XGBoost | Feature Engineering | Model Evaluation

AI & NLP: Large Language Models (LLMs) | Prompt Engineering | Sentiment Analysis | NLTK

Tools & Framework: FastAPI | REST API Integration | Git / GitHub | Jupyter Notebook | Gradio

WORK EXPERIENCE

Elevate Labs | Data & Analytics Intern | Remote

11/2025 – 12/2025

- **Dashboards & EDA:** Performed data cleaning, exploratory data analysis (EDA), and visualization on four real-world datasets (Netflix, Titanic, Healthcare, and Superstore) using Python (Pandas, Matplotlib), and developed Microsoft Power BI dashboards with KPIs, trend analysis, and regional insights to support data-driven decision-making.
- **Model benchmarking:** Evaluated Logistic Regression, Support Vector Machine (SVM), Random Forest, and K-Nearest Neighbors (KNN) models on the Titanic dataset, achieving 81% accuracy with the best-performing classification model.

Zaalima Development | Data Science & ML Intern | Remote

09/2025 – 11/2025

- Developed an AI-powered task management system using TF-IDF and Support Vector Machine (SVM) for task categorization, along with an XGBoost model for priority prediction through text preprocessing and feature engineering using Pandas and NLTK.
- **Deployment:** Deployed the complete machine learning pipeline as an interactive Gradio web application, automating task classification, priority prediction, and team assignment within a unified workflow.

Adobiz | Web Developer Intern | Remote

09/2024 – 11/2024

- **Responsive web build:** Developed and deployed a responsive website using HTML, CSS, JavaScript, and Bootstrap, implementing responsive design principles to deliver a consistent and mobile-friendly user experience.

EDUCATION

B.E. Artificial Intelligence & Data Science — SIES Graduate School of Technology (SIES GST), Navi Mumbai 2022 – 2026

Relevant coursework: Machine Learning · Data Structures & Algorithms · Database Management Systems · Statistics & Probability · Data Mining · Big Data Analytics

PROJECTS

AI Code Reviewer — github.com/Almaas211/ai-code-reviewer

Python · FastAPI · OpenRouter API · GitHub REST API · JavaScript

- **Agentic tool-use loop:** Built an AI tool where an LLM (Claude 3 Haiku via OpenRouter) autonomously selects and calls 2 custom tools — PR-metadata fetch and code-diff fetch — to review any public GitHub pull request end-to-end without manual prompting.
- **Structured review output:** Engineered severity-tagged findings across 3 levels (Critical / Warning / Suggestion) and a 3-way verdict (Approve / Request Changes / Needs Discussion), served through a FastAPI backend.

Healthcare Appointment No-Show Prediction — github.com/Almaas211/Healthcare-Appointment-NoShow-Prediction

Python · Scikit-learn · Power BI

- **No-show prediction:** Built an ML model on real patient-appointment data to predict no-shows, handling class imbalance and engineering features, with Power BI visuals to support clinic scheduling decisions.
